

Your pension statement explained

Your pension statement explained

Transaction costs and charges are costs that investment funds are charged when assets are bought, sold, or loaned by the fund. Some of the funds we use have higher costs than others due to how they are managed.

The Statement of Investment Principles (SIP) details the policies which control how a pension scheme invests. Our SIP sets out the policy of the HIPS Trustee on various matters governing decisions about the Scheme's investments.

The Implementation Statement is an annual statement that the HIPS Trustee produces to show how the SIP had been put into practice during the year. It also covers any review of the SIP throughout the year, subsequent changes made with the reasons for the changes, and the date of the last SIP review.

Your investment growth figure could be negative if your investments have dropped in value over the last 12 months. It's important not to panic if this is the case as your pension is a long-term investment in

Pooled funds are funds in a portfolio from many individual investors that are brought together for the purposes of investment. This type of investment is common for pension schemes.

which some ups and downs are normal.

Your Target Retirement Date (TRD) is the date when you're aiming to retire. Make sure this date is set in line with your plans, as it can affect how your savings are invested in the run-up to retirement.

An annuity is an insurance policy which provides you with a regular guaranteed income in retirement. You can buy an annuity with some, or all, of your pension pot and it pays income either for life or for a fixed length of time. Before buying an annuity, you can normally take up to a quarter (25%) of your pension pot as tax-free cash. You can then use the rest to buy the annuity. Annuities are taxed in the same way as earned income.

Inflation is the term used to describe the rate of rising prices over a given period of time.

Where you're going We hold a Target Retirement Date (TRD) for you and use it to work out these projections. Unless you've told us otherwise, your TRD is your 65th birthday. You can change your TRD at On 26/01/2067: which could give you an annual Your pension account could be worth income worth £272,000.00 £5,550.00 You can use the money in your pension account in lots of ways. We're only showing you what you might get income for life - also known as an annuity. We've taken account o inflation (price uses) in working this out, so when you're plannin our retirement you can think about what it would be like to have an annual income of £5,550.00 today. You should ct to have from other sources, for also consider any income vo example you State Pension. This projection is only an illustration of what you could get and is not guaranteed. To work these figures out, we've had to make some assumptions about the types of investment you have, their likely performance, how inflation affects what your account is worth, and how you turn your account in an income. We've also assumed that, if you and Hanson are currently paying into your account, you'll keep doing so at the same rates (percentage of salary) - and that if no one is currently paying into your account, no further payments will be made. What actually happens

You can read more about these and other assumptions at www.hansonpensions.co.uk/assumptions

a guide to help you plan.

may be different from what we've assumed. These figures are simply

What you could change

One option to try to give yourself more money is to save more into your pension account. Here's an example of the possible impact of saving a little bit more each month:

If you paid in an extra

your account could be worth an extra

which could give it a total value of

£343,000.00

£2% of salarv

could hopefully increase its final value.

£71,000.00

Another option is to give your money more time to grow by retiring later. While investment returns aren't guaranteed, the aim is that your account will increase in value over time, so leaving it invested for longer

You can increase the amount you save or change your TRD at www.hartlinkonline.co.uk/hanson
